Product Name POWDERED SUGAR

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product Name POWDERED SUGAR

Company Name Sugar Australia Pty Limited (ABN 82 081 245 169)

Address 265 Whitehall St Yarraville

VIC 3013 Australia Tel: +61 3 9283 4558

Telephone/Fax Tel: +61 3 9283 4558
Number Fax: +61 3 9689 4085

(24 hour a day available)

Recommended Use

Emergency Phone Number: Poisons Information Centre 13 11 26

As a sweetener or ingredient in food processing and food preparation

Other Names Name Product Code

ICING MIXTURE
ICING SUGAR
SOFT ICING

MARS DUSTING MIX
CSR BREWING SUGAR

CSR CHOCOLATE ICING MIX

TCP MIX 60/40 MIX

PURE ICING SUGAR

Other Information This Material Safety Data Sheet (MSDS) is issued by the Supplier in accordance

with the Code and guidelines from the Australian Safety and Compensation Council (ASCC, formerly National Occupational Health and Safety Commission - NOHSC). The information in it must not be altered, deleted or added to. The Supplier will not accept any responsibility for any changes made to its MSDS by any other person or organization. The Supplier will issue a new MSDS when there is a change in ASCC standards, guidelines, or regulations and/or a

material change in product specifications.

2. HAZARDS IDENTIFICATION

HazardNON-HAZARDOUSSUBSTANCE.ClassificationNON-DANGEROUSGOODS.

Hazard classification according to the criteria of NOHSC.

Dangerous goods classification according to the Australia Dangerous Goods

Code.

Other Information This product is a well known ingredient in food and beverages and this

Material Safety Data Sheet is concerned only with occupational exposures.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients	Name	CAS	Proportion
	Maize starch or tapioca starch		<=45 %
	Maltodextrin	9050-36-6	<=25 %
	Cocoa Powder		<=6 %
	Tricalcium Phosphate	1306-06-5	<=1.5 %
	Sucrose	57-50-1	Balance

4. FIRST AID MEASURES

InhalationRemove to fresh air.IngestionGive water to drink.

Skin Wash thoroughly with soap and water.

Eye Flush thoroughly with copious amounts of running water. If symptoms persist,

seek medical attention.

Print Date: 20/05/2010 CS: 1.4.93

5. FIRE FIGHTING MEASURES

Suitable

Extinguishing Media

Hazards from Combustion **Products**

Specific Hazards

Water, dry chemical, carbon dioxide and foam.

With heat, product burns/oxidises to form carbon, carbon monoxide and or carbon dioxide, and smoke.

Airborne sugar dust can explode where under certain conditions of temperature and humidity and where suspended in air exceeds 25 grams per cubic metre. Intrinsically safe dust extraction systems, cleaning procedures, electrical earthing and other safety measures must be used to avoid the risk of

explosion. Incompatible with strong oxidising agents.

Fire-fighters should wear full protective clothing and self contained

breathing apparatus (SCBA) operated in positive pressure mode.

6. ACCIDENTAL RELEASE MEASURES

Procedures

Precautions in

connection with Fire

Remove sources of ignition. Increase ventilation. Sweep up material avoiding dust generation, vacuum, or dampen spilled material with water to avoid airborne dust, then transfer material to a suitable container. Wash area with water ensuring all wash water is captured and discharged to an approved treatment facility. Notify relevant waste or environmental authority as required by the site's EPA licence, trade waste agreement and/or State legislation.

7. HANDLING AND STORAGE

Precautions for Safe Handling

Material can ferment if excessive moisture contamination is allowed. Fermentation can yield carbon dioxide with possible traces of ethanol or volatile fatty acids (e.g. acetic, propionic, lactic, or butyric) and if exposed to a spark or flame may result in an explosion. These conditions should be avoided. Airborne sugar dust can explode under certain conditions. Refer to Section 5: Fire Fighting Measures: Specific hazards. If maintenance of a storage bin / vessel requires entry by personnel, confined space precautions should be complied with. Insufficient oxygen may be present in vessels containing the product due to the generation of gases during fermentation.

Use only in a well ventilated area. Keep containers sealed when not in use. Prevent the build up of dust in the work atmosphere. Avoid inhalation of dust, and skin or eye contact. Establish good housekeeping practices. Remove dust accumulations on a regular basis by vacuuming or gentle sweeping to avoid creating dust clouds. Maintain high standards of personal hygiene ie. Washing hands prior to eating, drinking, smoking or using toilet facilities.

Conditions for Safe Storage

This product should be stored in its factory packaging in a cool, dry, well ventilated area, away from sources of ignition, oxidising agents and out of moisture. Keep containers closed when not in use.

Other Information

For further information refer to Sugar Australia's 'Granulated White Sugar Storage and Handling in Bulk', Sugar Australia's 'Explosion Risk Management and Housekeeping Standards for Sugar' and Sugar Australia's 'Granulated and Powdered White Sugar Storage and Handling in Flexible Intermediate Bulk Containers (FIBC) .

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

National Exposure Standards

No exposure standards have been established for this material, however, the TWA National Occupational Health And Safety Commission (NOHSC) exposure standards for dust not otherwise specified is 10 mg/m³. TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week. No Biological limit available.

Biological Limit

Values **Engineering**

Controls

General room ventilation should be adequate, but local mechanical ventilation may be required if dust is generated, particularly in confined spaces. Work areas should be cleaned regularly by wet sweeping or vacuuming.

Respiratory

An approved particulate respirator conforming to Australian Standards AS/NZS 1715 and AS/NZS 1716 should be worn when working with dusts. Respirators

Protection should be correctly fitted, maintained in good condition, and kept in clean

storage when not in use. Replaceable filters and cartridges should be replaced regularly in accordance with the manufacturers' guidelines and Australian Standards AS/NZS 1715 and AS/NZS 1716. Use only respirators that bear the Australian Standards mark and are fitted and maintained correctly, and kept in

clean storage when not in use.

Eye Protection Ventilated non-fogging goggles, splash resistant should be worn if dust is

generated. Final choice of appropriate eye/face protection will vary according to individual circumstances. Eye protection devices should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial

Applications.

Hand Protection Wear gloves of impervious material (such as PVC coated fabric). Final choice of

appropriate gloves will vary according to individual circumstances i.e. methods of handling or according to risk assessments undertaken. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection,

use and maintenance.

Personal Protective Equipment If engineering controls and work practices are not effective in controlling

exposure, then personal protective equipment may be required.

Body Protection Skin Protection: Direct skin contact should be avoided by wearing long sleeved

shirts and long trousers, a cap or hat, and gloves (PVC coated fabric or

equivalent AS 2161). Work clothes should be washed regularly.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical and

Physical and Chemical Properties given below relate to Pure Icing Sugar

Chemical Properties

Appearance White powder

Odour Sweet odour

Melting Point 160-186°C

Boiling Point Decomposes with heat.

Solubility in Water 2 kg per litre

Specific Gravity 1.59

(Air=1)

Evaporation Rate Not applicable
Flash Point Not applicable

Flammability Combustible, product will burn in surrounding fire situation.

Auto-Ignition 500°C

Temperature

Flammable Limits - Combustible

Lower

Flammable Limits - Combustible

Upper

Explosion Limit - 25-45 g/m³

Lower

Solubility in other Not applicable

solvents (kg/m3)

 $\textbf{Other Information} \qquad \text{For further information refer to Sugar Australia's 'White Sugar Properties'.}$

10. STABILITY AND REACTIVITY

Chemical Stability Stable

Conditions to Avoid Heat, flames and other ignition sources.

Incompatible Materials

Incompatible with oxidising agents.

Print Date: 20/05/2010 CS: 1.4.93

POWDERED SUGAR Product Name

Carbon dioxide and carbon monoxide may form when heated to decomposition. Hazardous Ethanol or volatile fatty acids (e.g. acetic, propionic, lactic or butyric) if Decomposition

fermentation occurs. Products Will not occur. Hazardous

Polymerization

11. TOXICOLOGICAL INFORMATION

Toxicity Data: Non-toxic - a foodstuff Sucrose: LD50 (Ingestion): 29,700 mg/kg (rat) Information Inhalation Sugar dust may irritate the nose and throat.

Ingestion No health effects under normal conditions of industrial use, but ingestion may

destabilise people with diabetes.

Skin Skin contact may result in mild skin irritation.

Eye Irritating to the eyes and may cause watering and redness.

Repeated exposure to the powder and dust may result in increased nasal and Chronic Effects

respiratory secretions and coughing, but not irreversible health effects.

Repeated skin contact may cause dermatitis.

12. ECOLOGICAL INFORMATION

Ecotoxicity Non-toxic to aquatic and terrestrial organisms. Sucrose is an oxygen depleting

substance in aquatic environments.

Persistence / Not available.

Degradability

Mobility Not available.

Environ. Protection Do not discharge product unmonitored into the environment.

13. DISPOSAL CONSIDERATIONS

Product can be treated as a common waste for disposal to an organic recycler Disposal or into a landfill site / wastewater treatment plant in accordance with Considerations

relevant Authority guidelines. Note Biochemical Oxygen Demand load in waste water streams. Return product to supplier for re-use / recycling if possible. Consult supplier for recycling options. Recycle containers if possible or dispose of in an authorised landfill. Transportation of wet sugar waste may require Waste Transport Certification. Refer to your local Environment

Protection Authority.

14. TRANSPORT INFORMATION

Not classified as a Dangerous Good, according to the Australian Code for the **Transport**

Transport of Dangerous Goods by Road and Rail Information

Not a marine pollutant. IMDG Marine

Pollutant (MP)

AICS (Australia)

15. REGULATORY INFORMATION

Poisons Schedule Not Scheduled

> All components of this product are listed on the Australian Inventory of Chemical Substances (AICS), or otherwise are in compliance with the NICNAS

requirements.

16. OTHER INFORMATION

Date of preparation or last revision of

MSDS created: February 2010
